

# Window Identity

To make a home, you need windows.

Relax,  
you are in good hands

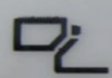

## THE WINDOWS, THE LOOK OF YOUR HOME

If you want to see what is behind a window, with window identity you can. Just enter the 14-character code located on the label in the appropriate field on the website [www.windowidentity.com](http://www.windowidentity.com).

You will have all the information related to that specific window. In fact, the code is the "DNA" of your frame; with the code we can go back to the life cycle of the window. Frame type, materials, performance label, manufacturer, retailer. Furthermore you will find all the information useful for the correct maintenance, cleaning and adjustment of the window.

If you encounter problems or anomalies, you can request the intervention of personalized personnel without the need for inspections. Window identity already says everything about your window.
